

# MIDWAY DR (Constantin - Picardy)

## Capacity Project

This new two-lane roadway connects Picardy Avenue and Constantin Boulevard (formerly Dijon Ave). Pedestrian and bicyclist facilities were installed on both sides of the roadway along with roadway lighting. The intersections of Picardy & Summa Avenues include raised intersections to decrease the speed of traffic and provide for greater pedestrian and bicyclist safety. Midway Drive is the first MOVEBR project completed within the Baton Rouge Health District. The land to install the roadway was dedicated as right of way in 2024 by Baton Rouge General Medical Center; the official street name was announced as BRG Way upon project completion.

**COMPLETED  
JULY  
2025**

**Total Cost: \$6,500,000.00**

**Council District: 11**

### KEY ELEMENTS

**Project Length 0.4 miles**

**Two-lane roadway**

**Sidewalks on both sides**

**Buffered bike lane  
on both sides**

**Crosswalks**
