

Traffic Benefits of the College Drive Project

- Backage Road moves traffic for local businesses off College Drive.
- Continuous median provides protected left turn opportunities at signalized intersections and improves Northbound and Southbound traffic flow on College Drive, improving safety along the corridor.
- Reducing the number of driveways on College Drive also reduces conflicts with pedestrians and bicycles thereby promoting mobility and safety.
- New northbound lane will reduce Travel Time between Perkins and I-10 by up to 43% in peak periods.
- Concord Avenue extension to the west coupled with relocating its intersection with College Drive improves the street grid system.
- Perkins Intersection improvements reduce delay by up to 33%.
